Estey Carriage Co.'s Changes.

The Estey Carriage Co. is moving the one story building which has been standing on the south side of the Corunna road next to the railway track to a new position west of the main building and north of the screen door factory. When in the new position the building will be enlarged by the addition of another story.

The company is rearranging its office space and will use the front room on the west side of the entrance for a general office. Office quarters have been rather crowded and the change will make the management of the company's business much more convenient as well as pleasant.

At Estey Factory B.

One of the large new planers recently ordered for the Estey factory B has arrived and was set up and put at work yesterday. The factory is rushed with work and last week turned out six hundred and sixty suits. Eight new carving machines which have been added lately and the new planers together, considerably increase the output. This factory is turning out some very handsome goods and its designs for the fall and winter trade are proving justly popular. No sooner, however, was work fairly begun on the fall styles than O. B. Estey, who does the designing himself for this factory, began work on the patterns for January, which he intends shall eclipse all past designs.

At the Ann Arbor Railway Shops.

A second boiler has been set up at the car shops. It will be used chiefly for heating, but will be connected up so that it can be used also for power.

The work of putting in steam pipes for heating has been begun, and the coming winter will see stoves dispensed with in the machine shop and in the wood working mill, and the more comfortable and convenient steam pipes in use. The other buildings will probably not be piped until another year.

The brake instruction room is now nearly ready. In fact it is ready for the brakes themselves, which are furnished free of charge by the Westinghouse company. This company sends thirteen brakes—one engine brake, one tender, one passenger and ten freight car brakes, over five hundred dollars worth in all. W. Barnes, who has charge of all brake work is expecting the arrival of this machinery daily.

A large new sky light is to be placed in the roof over the engine room and brake room.

The usual number of locomotives are being overhauled in the machine shop and the work of building box cars is being continued in the carpenter shop, though a few bumpers to guard the ends of switches, and some baggage trucks have also been turned out.

Outgrowing their Quarters.

Copas & Son have so increased their business that their large establishment on S. Water street has already become too small for them. They will in the near future take measures to better their condition, though they may not feel prepared to carry out their complete plans this fall.

At all events work will soon be commenced on a large ice house about 40x60 feet or over. This will be built in the rear of the buildings now in use, on the bank of the river, and will be one added convenience and necessity.

If everything works as well as they hope for, however, a four story brick addition will be built south of the large brick building now in use, taking up the space between this building and the Thomas apple dryer. This additional room is most needed of all, and if built would allow the space in the building to be used much more economically. The fourth floor would be used for the poultry trade, the third for making and storing shipping boxes and crates, while the first and second floors would be used for the pork business with cold storage facilities in connection.

Death of Mrs. Moses Mix.

The death of Mrs. Louise Mix which has been almost hourly expected for several weeks occurred about midnight Tuesday night at her home just outside the city limits, near North Washington street.

Mrs. Mix, who was seventy-six years of age, was born at Oil Creek, Pa. Later she came to Michigan and in 1859 married Moses Mix at Battle Creek. In 1857 Mr. and Mrs. Mix moved to this city which has been their home since with the exception of one or two years. Mrs. Mix was one of the oldest members of the M. E. church in this city and one of the most faithful in her work and devotion to the church.

For a number of years she has been a sufferer from rheumatism and her sufferings were further increased in May of the present year by a stroke of paralysis, from which she never fully rallied. For the last few weeks she has been continually failing and was unconscious for several days preceding her death. On Tuesday, however, her mind cleared up and she recognized her husband.

The funeral services were held yesterday at the residence, conducted by Rev. John Sweek. The body was taken for burial to Stockbridge, the home of a sister of Mrs. Mix, Mrs. Green, who has been attending her in her last illness.

WANTED—1000 tons timothy hay, for which I will pay the highest market price. A. Todd.

Class Reunion of Byron School.

A class reunion, held nineteen years after graduation, was the occasion of a pleasant party at the home of Mr. and Mrs. A. H. Northway, Adams street, Friday. The class graduated nineteen years ago from the Byron school, and its members are Mrs. A. H. Northway and Senator Hadsall, of this city; Mrs. Minnie Emmet, of Howell, Rev. A. S. Tedman, of Judd's Corners, and Mrs. J. D. Royce, of Corunna. One other member of the class, Mr. Allen Norris, was with them originally but died soon after graduation. The reunion of Friday was entirely informal but the members with their husbands and wives were in for a good time and had it, as usually happens on such occasions. The members intend to hold reunions yearly hereafter.

University Extension.

The following brief sketch of the professional training and the literary work of Prof. Edwin E. Sparks, Extension lecturer for the Owosso Center Lecture Course, beginning Oct. 8th, next, will be read with interest by the general public as well as by the members of the center. We bespeak for Prof. Sparks a larger interest than has at any time been shown in extension work, because of the popular themes he is to discuss in his six lectures, "Character Sketches in American Development."

Edwin E. Sparks was graduated from the high school of London, Ohio, and soon after entered the Ohio State University. After receiving his degree he remained at the University as assistant in American history, and became amanuensis to Prof. John T. Short, in the preparation of the "Prehistoric Races of America," "Industrial History of Ohio," etc. After several years in teaching history in high schools, he pursued historical studies in Harvard University, under Dr. Albert Bushnell Hart, and was for five years a professor in the Pennsylvania State College. During the last three years of this period Mr. Sparks was a lecturer in American history, under the American society for the extension of University teaching, Philadelphia. His work here attracted the attention of the Extension Department of the University of Chicago, and in October, 1895, he accepted a place among the staff lecturers of the University. He has published "Topical Reference Lists in American History," besides many periodical and newspaper articles.

Odd Fellow Picnic.

The I. O. O. F. picnic held in Tillotson's grove, north of Elsie, last week Thursday, was largely attended, considering the number of picnics and busy time of the farmers at that time, there being upwards of four hundred people in attendance.

After enjoying their bountiful dinners the program, with a little alteration, was carried out to the satisfaction of all present.

Speeches were made by Frank Van Curen, of Henderson, Rev. I. N. Shilling, of Chapin, and F. W. Fillmore, of Owosso. The other speakers failed to put in an appearance.

Delegates from thirteen lodges met at the Maple River lodge room in the afternoon and organized an association for holding annual picnics under the name of the United Lodges of Maple Valley. The officers elected were as follows: President, Elmer G. Smith, of Chapin; vice president, John Q. Abel, of Owosso; secretary, L. C. Clark, of Elsie; treasurer, Emma Amos, of Henderson. After organization and adoption of a constitution, all returned to their homes feeling that they had spent a profitable day.

His friends all wish him the best of success—Mrs. Wm. Johnson is reported some better at this writing.

Try Grain-O! Try Grain-O!

Ask your grocer to show you a package of GRAIN-O, the new food drink that takes the place of coffee. The children may drink it without injury as well as the adult. All who try it, like it. GRAIN-O has that rich, real brown of Mocha or Java, but it is made from pure grains, and the most delicate stomach receives it without distress. 1/4 the price of coffee. 15c and 25c per package. Sold by all grocers.

City Schools.

City schools begin Tuesday morning September 7. It is important that all who expect to attend this term should be in attendance the first day. Classes are then formed, programs made out, and arrangements made for the term.

Beginners will not be received into first grade after the second week. The division line between schools are as last year. They are the following streets: between Central and Emerson, Washington street; between Emerson and Washington, Comstock street; between Washington and Bryant, Shiawassee street; between Bryant and Central, Clinton street.

Pupils promoted from the 6th grade Bryant, last June, now go to the Washington school. Pupils should take their promotion cards with them next Tuesday.

Pupils not yet classified in the schools will report to the principal of the school where they will attend.

Unequal attendance may cause some changes in schools, after the enrollment is known. This makes it all the more important that all be prompt the first morning. There will be a teachers' meeting at room 12, Central school, at 4 p. m., Saturday, September 4.
